Network Access on Apple iOS

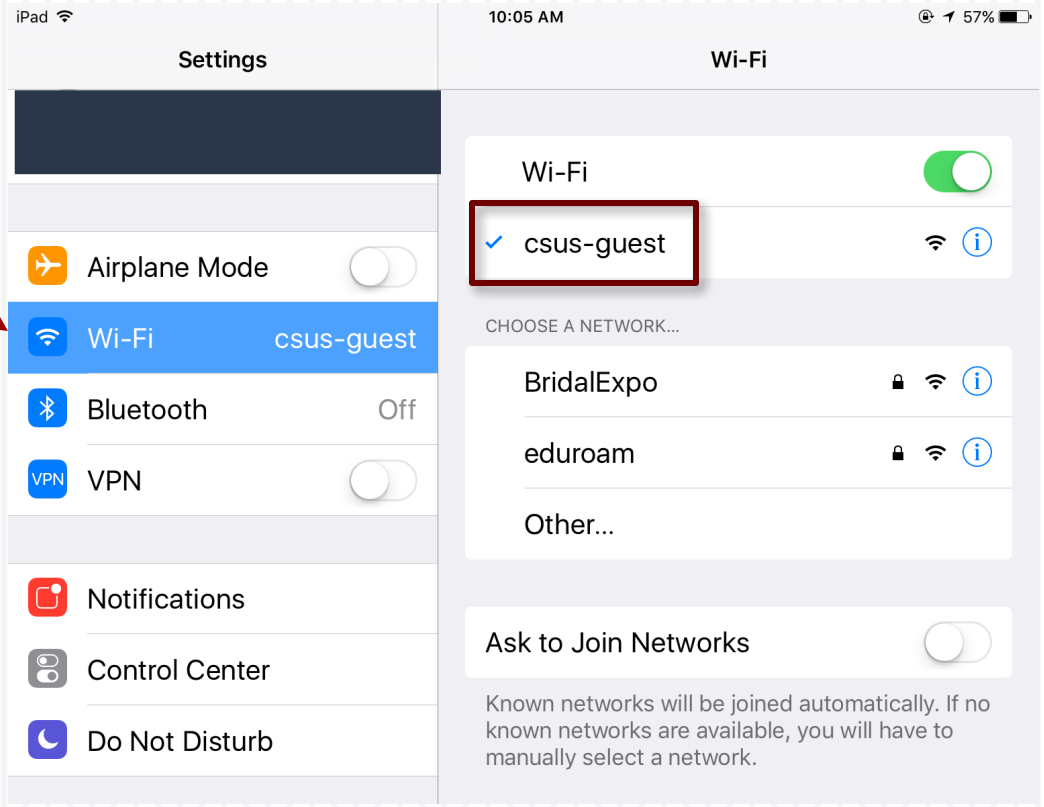
Configuration of iOS Devices
on **eduroam** network

iOS Network Access Configuration

- Begin by selecting the “Settings” icon on your iOS Device

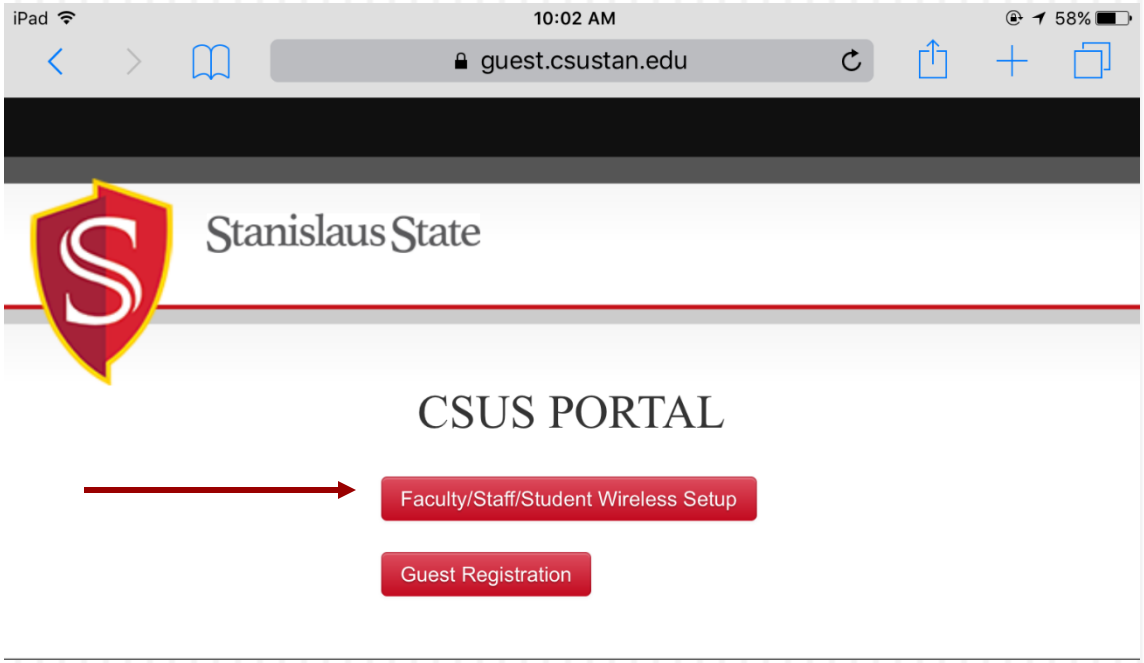
iOS Network Access Configuration

- Select ‘Wi-Fi’ from the left side column
- Then select the network labeled ‘**csus-guest**’.



iOS Network Access Configuration

- A captive portal will automatically launch. Tap **Faculty/Staff/Student Wireless Setup**
- If you do not see this page, please open a browser and go to **https://guest.csustan.edu/guest/device_provisioning.php**

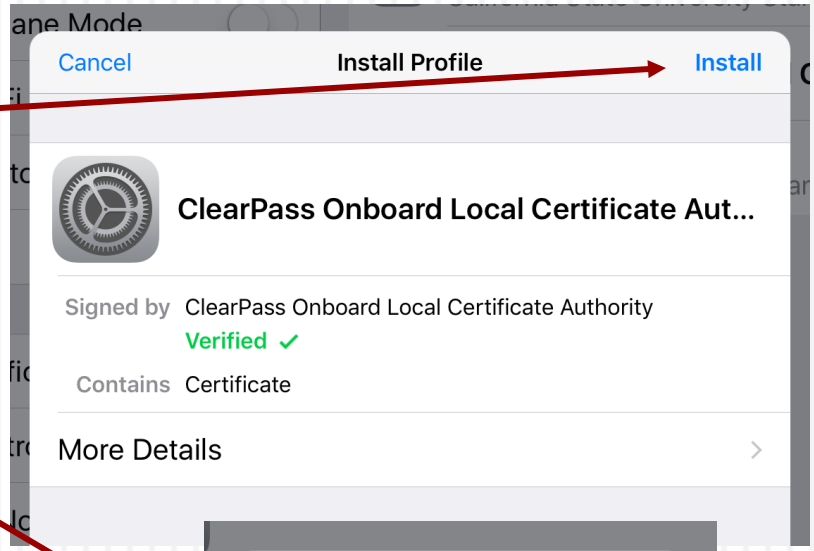


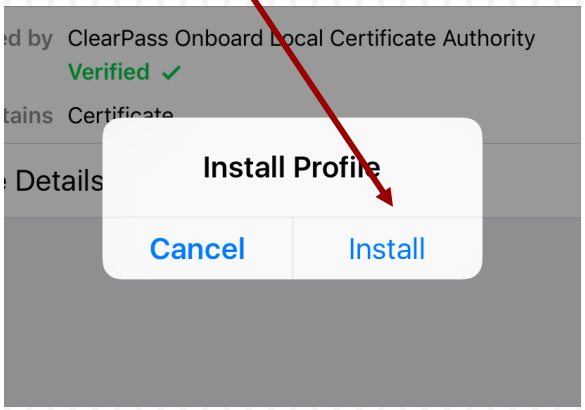
iOS Network Access Configuration

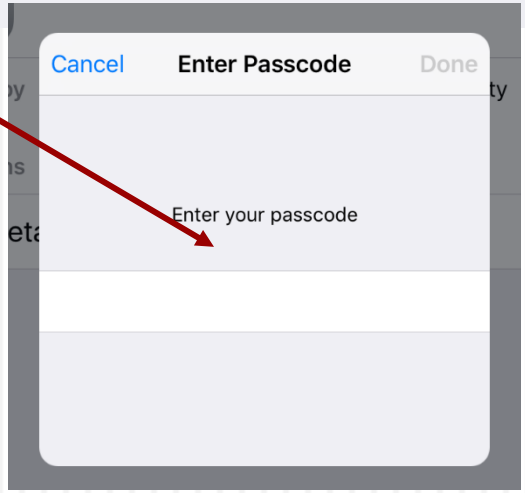
- Tap on the **Install root certificate (click here)** to install certificates.

iOS Network Access Configuration

- A certificate window will pop up. Tap **Install** to continue
- Enter your **device pin.**
- Tap **Install** to complete install.

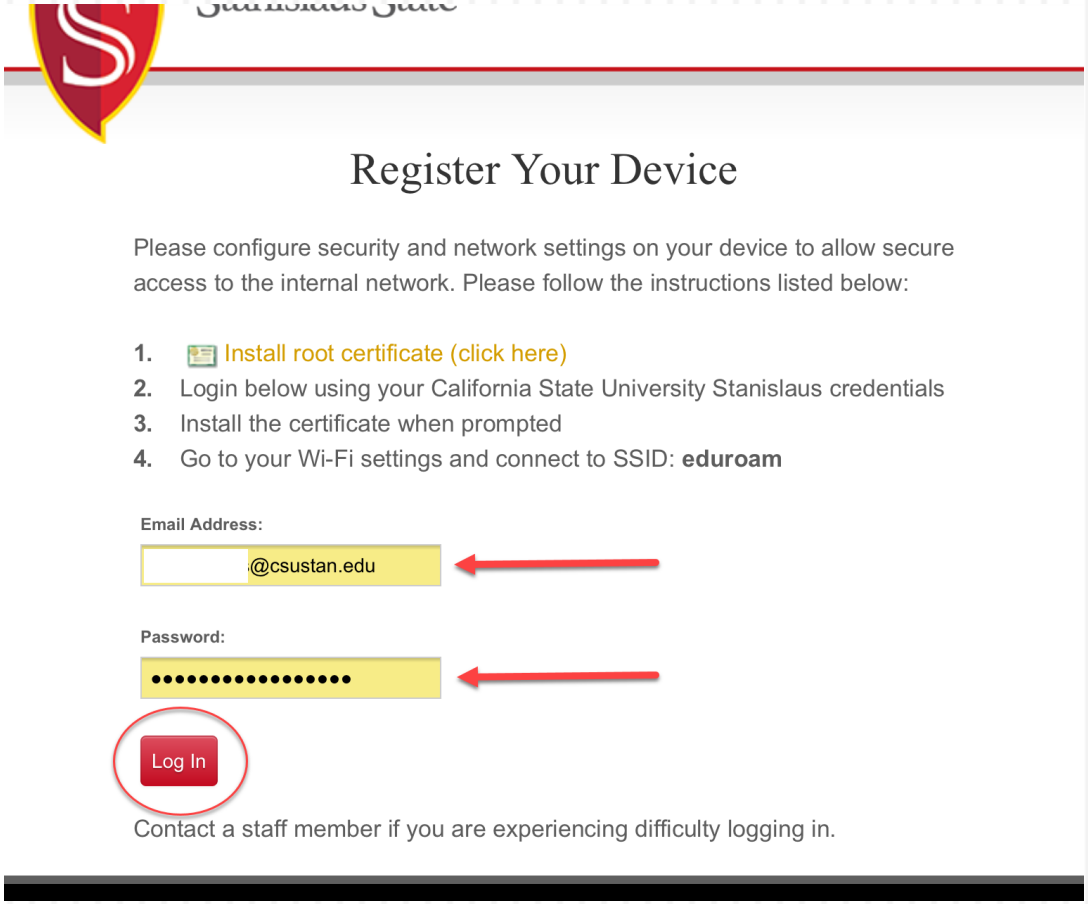






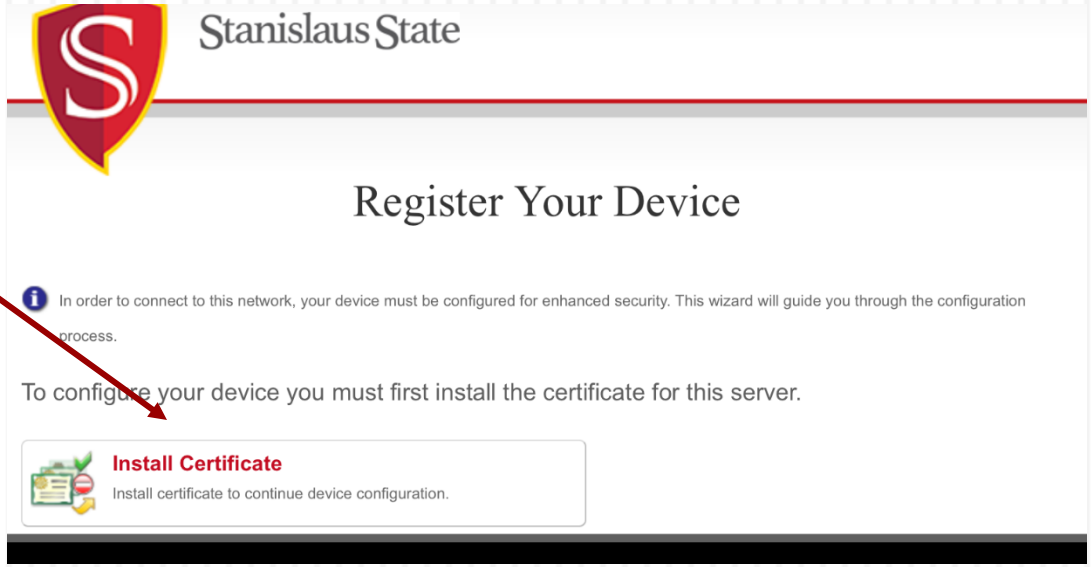
iOS Network Access Configuration

- Enter your **full university email** and **password.**
- Tap **Log In** to continue.



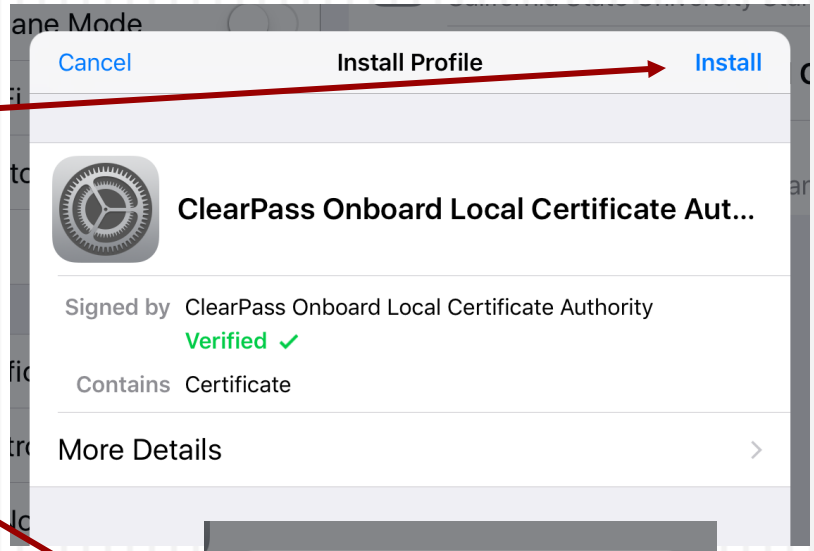
iOS Network Access Configuration

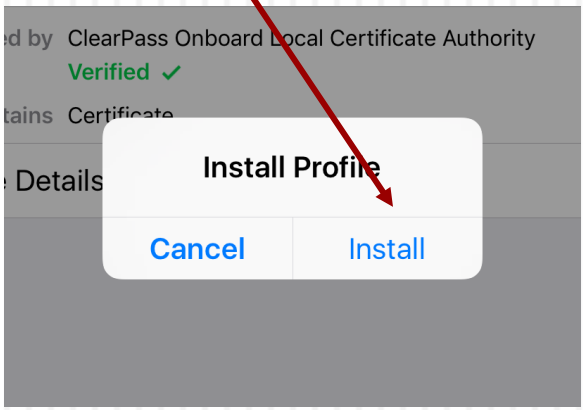
- Tap **Install Certificates** to install a second set of certificates.

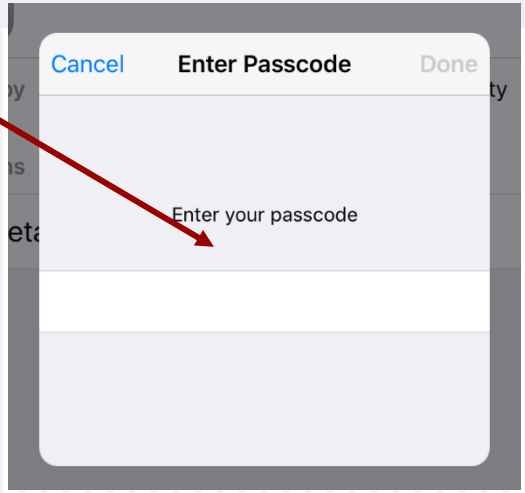


iOS Network Access Configuration

- A certificate window will pop up. Tap **Install** to continue
- Enter your **device pin.**
- Tap **Install** to complete install.

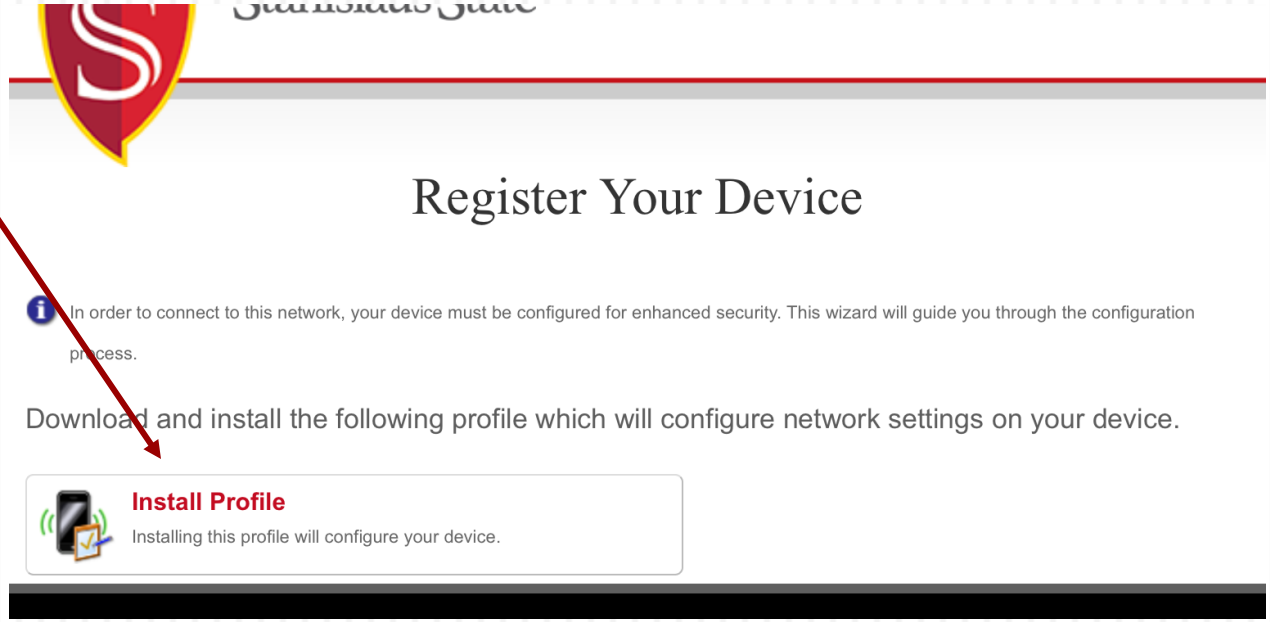






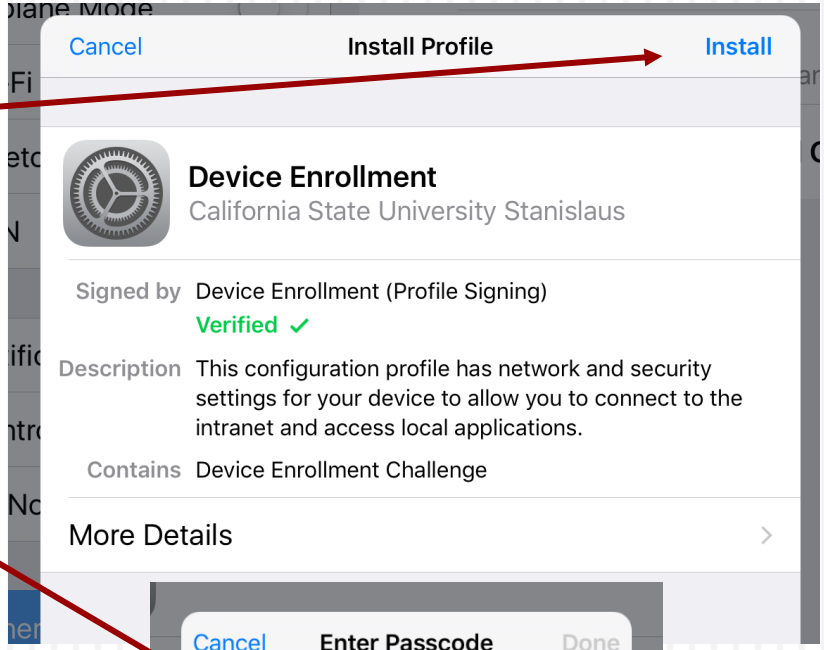
iOS Network Access Configuration

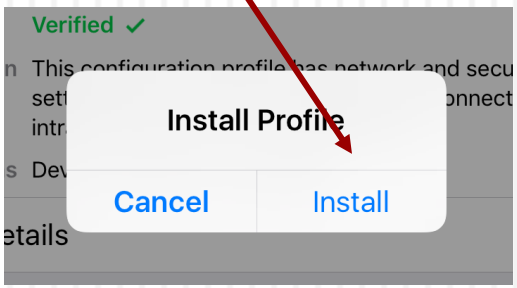
- Tap **Install Profile.**

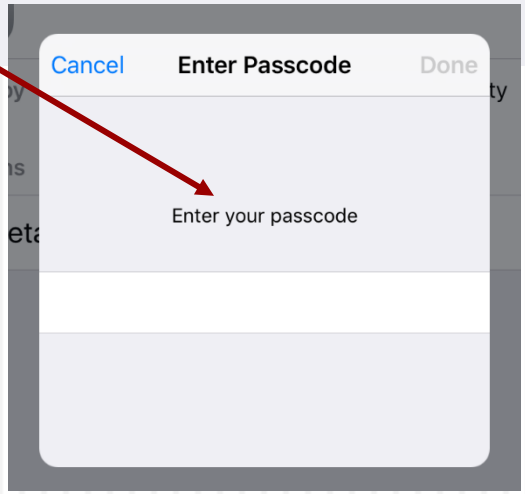


iOS Network Access Configuration

- An enrollment window will pop up. Tap **Install** to continue
- Enter your **device pin.**
- Tap **Install** to complete install.

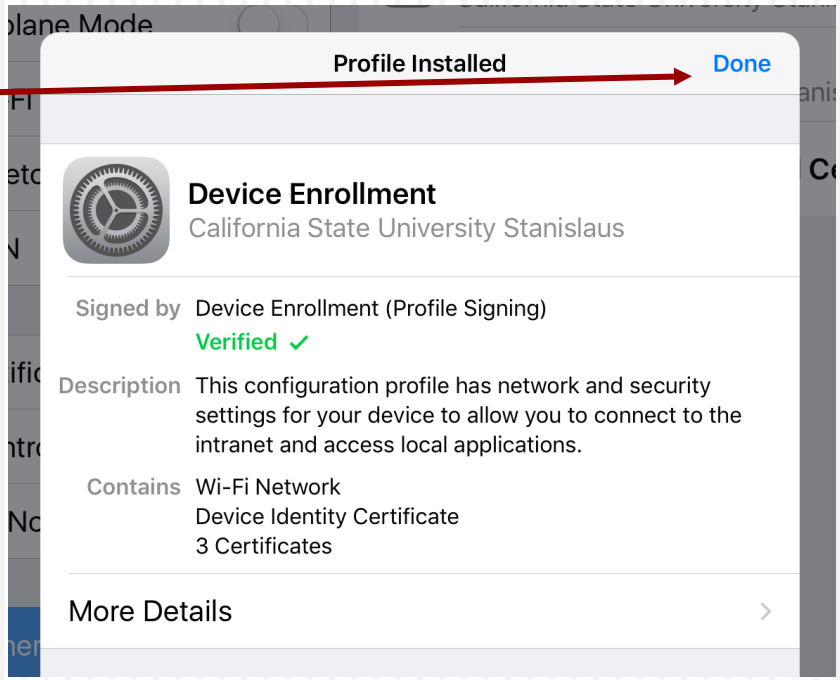


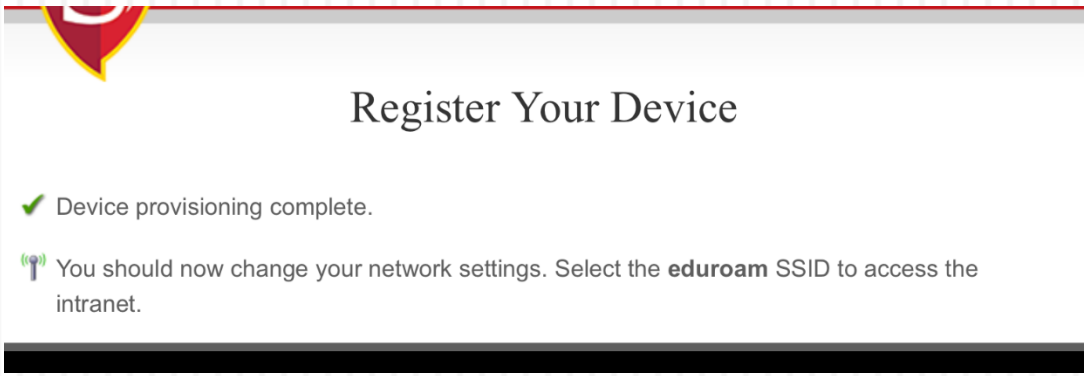




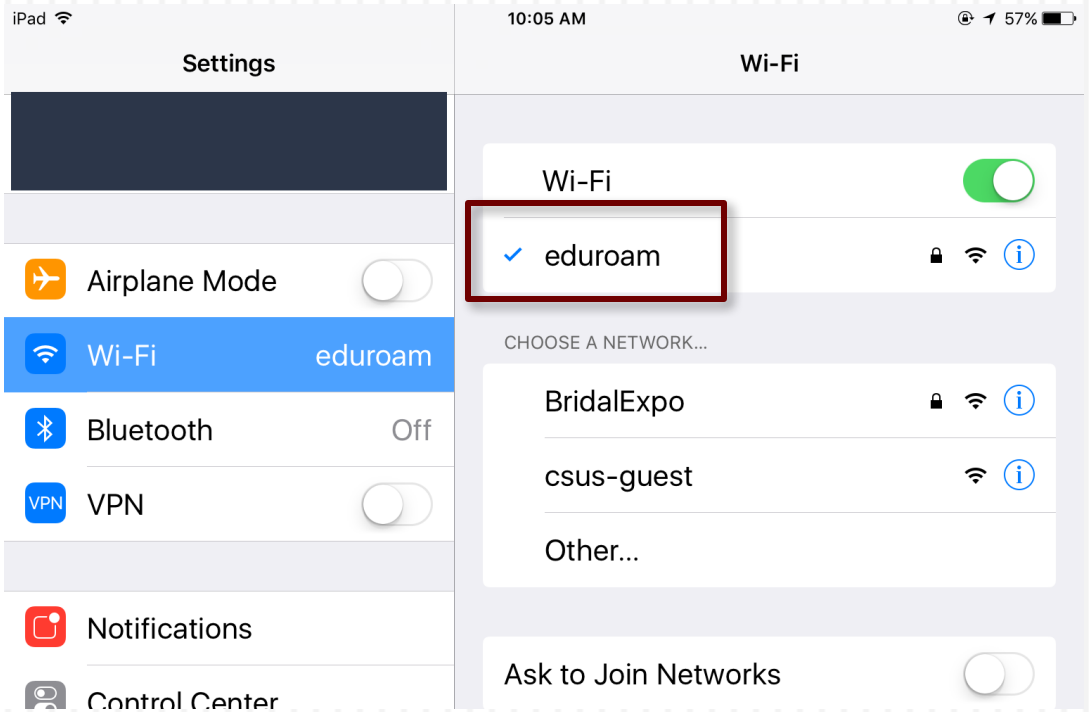
iOS Network Access Configuration

- Tap the **Done** button when it appears.
- Device Provisioning is now complete. You may close your browser.





iOS Network Access Configuration

- Go back to the Settings icon, tap Wi-Fi, and select **eduroam**.


If you received any errors during the process, please contact the Technology Support Desk at 209-667-3687 or TechSupport@csustan.edu
