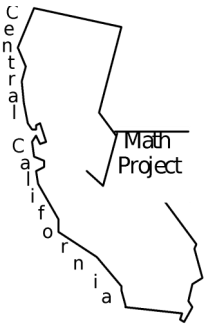
Central California Math Project (CCMP)

Transitioning from High School to College

The Central California Mathematics Project (CCMP) serves K-12 Mathematics teachers by providing rigorous professional development that is aligned with Ca-CCSSM standards. Sessions are designed by K-12 and university educators to enhance student learning and foster understanding of mathematics.



CCMP invites you to a panel presentation to discuss recent changes in CSU and Community College Mathematics Education. Math faculty from Stanislaus State, Merced Community College and Modesto Junior College will introduce and examine course modifications and student requirements. The presentation will be followed by a Q&A session.

Date
Saturday, March 3, 2018

Location
Science Building, Room S104

Time
9:00 - 11:00 AM

Food & Beverage
Breakfast & Lunch provided

Advanced Registration Required

BECOME THE MATH TEACHER YOU WISH YOU HAD

A special session hosted by Stanislaus State Mathematics Professor Dr. Curtis Pro will present a "hands on" approach to getting familiar with, using, and presenting important mathematical concepts at the High School level with the free and powerful software Geogebra. Join Dr. Pro after lunch from 12:00 PM-3:00 PM to learn more about this innovative software.

For Additional Information Contact Dr. Coughlin, hcoughlin@csustan.edu or Dr. Jóhannsdóttir, bjohannsdottir@csustan.edu
CCMP is located in the Department of Mathematics at California State University, Stanislaus
