

# Lecture Notes on the Document Camera:

(also known as an "Elmo")

## 1. Leave a space for the PIP●

(Picture-in-Picture)

## 2. Use bold fonts > 18 point or larger

(this 10 pt. example is typical of photocopied book text. Notice how difficult it is to read when compared with 18pt. bold).

## 3. Use Key Words,

### not Paragraphs...

(12 pt.) The shift from an industrial economy to an information economy is creating more adult students who require life long learning.

They will change jobs frequently during their working life, and will require additional education. In addition there will be a significant increase in the number of "traditional" students who need an education.

## 4. Use 1/2 of an 8 1/2" x 11" page for maximum legibility

(making the best use of the 3 to 4 TV aspect ratio...)
