

CBA Concentrations Operations Management

Operations Management (OM) is concerned with managing operations in manufacturing and service organizations. It involves the management of manpower, materials, facilities, processes, technology, and equipment for the efficient conversion of resources into quality product, and services, as well as their distribution.

Operations Management managers apply their expertise and knowledge in the design, analysis, and planning of production lean systems, as well as supply chain management. They utilize management science techniques and modern strategies to continuously improve the company's productivity and quality of its products and services.
