

## Instructions for Macintosh

### How to associate plug-in with Browser

The following instructions should appear the first time Brio Web Queries is accessed.

1. Click Here to download the setup program.
2. Run the setup program by double clicking the Brio.Insight or Brio.QuickView application.  
The setup program should have been downloaded to your desktop. Allow the setup program to create and install the application in a Brio.Insight or Brio.QuickView folder.
3. Delete the setup program.
4. You need to configure your browser to work with the helper application. See instructions below.

Configure Browser to work with helper:

- A. Start browser application.  
For Netscape: Go to Options > General Preferences and select applications.  
For Explorer: Go to View > Options and select File Types.  
OR Go to Edit > Preferences and select File Helpers.
  - B. Click NEW or ADD.
  - C. Enter the following to add description for .bqy file type.  
  
Description = BrioQuery document  
MIME Type = application/x-brioquery  
Subtype = x-brioquery  
Extension or suffix = .bqy
  - D. Launch application option.  
Browse to location of your helper application (Brio.Insight or Brio.Quickview) and select application
  - E. Your browser (Explorer) may also ask you how to handle data. Select VIEW WITH APPLICATION.
  - F. Click OK.
5. Close the message window and return to the OnDemand Server.
