

CSU Stanislaus PeopleSoft SA8.9 - Known Issues Log for PICWEB (Big Project)

PID	Problem/Issue/Suggestion	Work Around Solution/Temporary Fix	Status
001	Error with data Roll Process	N/A	Fixed
002	Error with data Roll Process	N/A	Fixed
003	Missing Component information on Add New Class button...When putting LEC as component type, gets an error that Prompt table's record definition is not found.	N/A	Fixed
004	Faculty Names not appearing correctly in PICWEB	N/A	Fixed
005	Instructor EMPLID Lookup is not pulling all people assigned to a particular ORG ID	N/A	Fixed
005a	Seeing duplicate names upon Lookup with same EmplID.	N/A	Fixed
006	Courses that were cancelled in Fall 08 schedule got rolled into Fall 09 schedule.	N/A	Fixed
007	If you uncked a deleted class on the PICWEB page, the units Min and Max become editable again to any amount, even if it's not variable units.....this should remain display only if it's a non-variable units class or editable if it's variable unit. (after you save the page..the fields become display only again)	N/A	Fixed
008	Generic Faculty IDs (Part Time, Full Time, Tenure Track) are in the Inst/Advisor table in PS, but do not appear in PICWEB.	N/A	Fixed
013	Proj Enrl FTEs should be display only, not updatable.	N/A	Fixed
014	Proj Enrl FTEs should be calculated based on the Component Units for the section, not the Max Units for the course. This is leading to inflated FTES.	N/A	Fixed
025	You cannot use the delete box from Basic Data and then Save to delete a class if the class has no instructor assigned. You get an error that the ROLE field is required.	To correct classes already on the schedule that have a blank Role field, simply change the Role to Primary Instructor for one class. Press Save. This should cause all of the other classes with blank Role fields to populate with Primary Instructor.	Fixed
019	Sign Language subject appears under Acad Org 688-COMM. Should appear under 280-MODL	N/A	Fixed

CSU Stanislaus PeopleSoft SA8.9 - Known Issues Log for PICWEB (Big Project)

PID	Problem/Issue/Suggestion	Work Around Solution/Temporary Fix	Status
021	Unable to add a sections to certain courses. Receiving a "Duplicate entry error...." error from PS.	Discovered that when the canceled classes were deleted from PICWEB, the notes did not get deleted, so there was an existing data conflict with adding a new class or new section where the section number already existed in the notes table. Deleted the notes from PICWEB and I tested the Art 3150 example and the previous English 1000 and Nursing 3000 with success.	Fixed
009	Since the CLASS NBR will be "regenerated" after we roll back into PS, for the final phase, can we "hide" the class nbr column. Also can we hide Course ID as it is not necessary for dept use.	N/A	Fixed (except for Course ID)
010	Have Association Number field carry over from tab to tab, for ease of instructor and mtg pattern updates/changes	N/A	
011	Users suggest it would be helpful if the column headers "follow" as they scroll down the page.	N/A	
012	Users suggest it would be helpful if the min/max units on the zero units lab/act components be hidden. Can we hide the lab units for components that are worth zero units?	N/A	
015	Workload field calculation is not calculating on initial data input, or is not updating when the load factor is updated. Seems the value gets "stuck" on what it was previously or never calculates initially.	When adding a new class or row to the instructor tab, be sure to input the Load Factor of 100.00 and use the TAB key to move out of the field. Save. Workload field should calculate appropriately. If you do not TAB out of field and "click" out instead the field becomes inactive and will not update.	
016	If a single subject Acad Org (ex: 270-FA) had no class that rolled into PICWEB from the previous term, then users cannot use "Add New Class" button to add a class to the new term. For example, 2094 FA 1000, when user goes to that org 270-FA, no classes appear and they cannot add one for that term. They get error "Please add valid Catalog Nbr before inserting new row," but fields are display only.	N/A	

CSU Stanislaus PeopleSoft SA8.9 - Known Issues Log for PICWEB (Big Project)

PID	Problem/Issue/Suggestion	Work Around Solution/Temporary Fix	Status
018	Upon initial roll in to PICWEB, or when dept added a new meeting pattern row on the Meetings tab, an additional instructor row did not get added to the Instructors tab.	<p>Use the "Show All" button to see if there is a class that has been "deleted" from the Meetings Tab, which then would cause a delete from the Instructors Tab.</p> <p>Uncheck the "delete" for the Meeting pattern that has the Instructor row attached to it.</p> <p>Save.</p> <p>This will allow the Instructor row to be active. Next, make sure you "delete" the bad Meeting pattern with no instructor attached to it.</p> <p>Update the remaining Meeting Pattern and Instructor rows with the correct data.</p>	
020	When MUS classes use the the "+" to add a new section they cannot update/change the "Designation" field. It is display only. They need to be able to update this field with a particular requirement designation.	<p>Do not put a Designation value for classes that have this issue.</p> <p>Use the appropriate "Note Nbr" on the Notes tab to indicate the Instrument needed for a class.</p>	
022	Users suggest it would be helpful if there was a way they could access the Combined Sect ID table in display mode only, so they could see what the other department has for their enrollment numbers etc. And they can also see what other dept shares their unique Combined Section ID.		
023	Create index on PS_NAMES to speed up instructor ID lookup on EMPLID field on Instructors Tab.		
026	PICWEB will not allow you to lookup or type in a value in the Meeting Pattern Code field in new rows. You CAN lookup the value in existing rows.	<p>Add the new section to your schedule.</p> <p>Save it with a blank meeting pattern.</p> <p>Now, go back to the PAT column on the Meetings Tab and the values will be available when you lookup the meeting pattern.</p>	
027	Move "+" button to add a new row to the left side of the screen in between the row number and Course ID field	N/A	
028	Review process behind Delete Checkbox on Basic Data tab to speed up processing time between deleting multiple classes.	Delete one class at a time.
