About us:

The Sistas In Support Mentorship Program started with a discussion between two students in Fall of 2020. This idea quickly became a reality with the guidance of two African American women faculty who shared a similar goal.

Sistas In Support is designed to pair students with staff members, faculty, and admin who have similar academic backgrounds, hobbies, and career interests.

Our goal is to continue to grow our campus community and ensure that our Black Women know that they have support and a home away from home.

Our mission:

The Sistas In Support (SIS) Mentorship Program was created to provide Black Women at Stanislaus State with support and a sense of belonging.

We are here for you, so get involved and come find your crew!
