Rev. Sept. '12

Too often overlooked, Operations Management is at the core of every company's success. Operations Management is concerned with managing operations in manufacturing and service organizations. It involves the management of manpower, materials, facilities, technology and equipment for the efficient conversion of resources into quality products and services, as well as their distribution.

Majoring in Operations Management provides exciting, rewarding and challenging career opportunities in a wide variety of organizations. Businesses are increasingly placing a stronger emphasis on lean manufacturing, supply chain management and quality management resulting in an increased demand for OM graduates.
