

Tips for Firefox & Safari

This guide outlines various tips related to Firefox and Safari as it relates to myCSUSTAN.

Setting up Firefox to allow Pop-ups from myCSUSTAN to enable downloading:

Following are steps required to set up your Pop-Ups for Firefox browser in order to have the ability to **download data from the system to Excel.**

Setting up Firefox to allow Pop-ups from

1. Start up your Firefox browser
2. Click the Firefox menu and select Preferences
3. Select the Content tab from the top of the Preferences Window
4. Next press the Exceptions button that corresponds to Block pop-up windows. (the first one)
5. In the Address of web site bar type:
cmsweb.csustan.edu
6. Click the Allow button to add the URL to the list of allowed sites.
7. You can now close the allowed sites and preferences windows to save your new settings.

Printing Class or Grade Rosters from Firefox or Safari:

Following should be noted for each browser:

- Safari:
 - When printing class or grade rosters with Safari as the browser, all pages will print fine, but the page heading may be a bit off.
- Firefox:
 - When printing class or grade rosters with Firefox as the browser, only one(1) page prints. If you right click on the page and select "This Frame" then "Print This Frame" you will get a complete roster page.
- Downloading to Excel
 - Downloading class or grade rosters to Excel works with Firefox and Chrome but not Safari.
