The Tahoe National Forest is 850,000 acres located in the north central Sierra Nevada Range between Lake Tahoe and the Sacramento Valley. The land rises from an elevation of 1,500 feet in the Sierra foothills on the west to 9,400 feet along the rugged ridges of the Sierra Crest. Interstate 80 and Highway 49 crisscross the Forest and offer year-round access. The forest has served as the gateway to the Pacific since the first pioneers crossed the plains in search of the riches of the California gold fields in the 1840s. This history is still much in evidence, as local communities have retained the flavor and character of their Gold Rush origins. The Forest is truly one of multiple uses. Timber and biomass harvest continues to be viable in the Gold Country. It is also a very important recreation forest. Wilderness and Wild River uses, Western States Trail, off-highway vehicle use, hiking, camping, fishing, rafting and kayaking are popular local activities. Mining is still popular today with about 1500 active claims on the Forest. Water issues are also becoming increasingly important as rivers that originate in the Forest provide water to local communities as well as the Reno, Sacramento and Southern California areas.

Yuba River Ranger District Duty Locations:

Nevada City, CA:

Considered one of the most desirable places to live in California, Nevada City and its companion city Grass Valley, offers the amenities of a much larger community, as well as a rural setting. Numerous medical services including a full service Hospital, a community college and several live theaters are also available. Western Nevada County has a population of about 50,000 although the incorporated area of Nevada City is 3,000 and Grass Valley is 10,000+. Housing prices range from \$250,000 to \$650,000. Apartment / House rentals range from \$800.00 and up. Pines, oaks, and maples as well as numerous reservoirs and streams surround these attractive foothill towns. The average rainfall is about 55 inches. An occasional snow occurs during the winter, but does not remain long. Summers range from 85 - 100 degrees. Within less than 30 minutes commuting distance are the communities of Colfax, Cedar Ridge, Penn Valley, Lake of the Pines and Alta Sierra. Within approximately 45 minutes commuting distance are the communities Auburn and Downieville. Truckee is approximately a 1 hour drive (in good weather) over the Sierra Crest from Nevada City. The Tahoe NF is located in the north central Sierra Nevada Range between Lake Tahoe and the Sacramento Valley. The land rises from an elevation of 1,500 feet in the Sierra foothills on the west to 9,400 feet along the rugged ridges of the Sierra Crest. Interstate 80 and Highway 49 crisscross the Forest and offer year-round access. The forest has served as the gateway to the Pacific since the first pioneers crossed the plains in search of the riches of the California gold fields in the 1840s. This history is still much in evidence, as local communities have retained the flavor and character of their Gold Rush origins. The Forest is truly one of multiple uses. It is also a very important recreation forest. Winter skiing, kayaking, hiking, mountain biking and camping are popular local activities. Mining is still popular today with about 5,000 claims. Early day land grants to railroads have accounted for a checkerboard ownership pattern throughout most of the Forest. Although mostly owned by private timber companies, this extent of private land offers growing challenges in the form of a developing urban/rural wildland interface. Water issues are also becoming increasingly important as rivers that originate in the Forest provide water to local communities as well as the Reno and Sacramento areas.
