My "Handy" Garden
by
Farmer

Today is

I planted 5 seeds.

My "farm" is a clear plastic glove. I dipped a cotton ball in water. Then I dipped the cotton ball into seeds. I did this five times. Each time I placed the cotton ball in a different finger. I will watch five different kinds of seeds grow.

I think the__________ seeds will start growing first.
I think it will take ___ days for the first seed to start growing.
