The menu in Bb 9.1 can be hidden to allow more screen space. A hidden menu will show again after logging out and back in again. A hidden menu will remain hidden in the course during a session, but not in other courses.

When logging in or entering a course, the navigation menu is in the **Show** position by default. The navigation menu hides the repositioning arrows and editing chevrons until the user hovers over the menu item name.
To hide the menu to allow more screen space for content, hover over the space between the menu and the content. The Hide Arrow appears. Click the Arrow to hide the menu.
To open the menu, hover over the space to the left of the menu. Click the Show Arrow.
