

BIOL 1050 Lab

Spring 2015

Instructor: Erica Fleming

Email: efleming2@csustan.edu

Office Hours: N 254 Mondays 10-10:50, Wednesdays 11-11:50 or by appointment.

Text: Symbiosis Lab Manual for BIOL 1050 available at the campus bookstore. Photocopies not allowed.

Learning Goals:

1. To provide an overview of basic knowledge, principles, methodologies, theories, and perspectives in biology.
2. To offer opportunities to work in groups with other students to practice effective communication about concepts in biology.
3. To provide a broad understanding and appreciation of biology and encourage continuous inquiry and lifelong learning.

Grading

Quizzes	100
Lab Write-ups (5 x 20 points)	100
Final Exam (Lab Practical)	100
TOTAL POINTS	300

Quizzes

This lab includes 11 quizzes worth 10 points each. Questions range from background vocabulary and specific results of the previous lab to application of concepts to new scenarios. One to two questions on each quiz will be from the **upcoming lab**, which you are expected to read ahead of time. These questions are general in nature. For example, if we are about to do the enzyme lab, know the definition of an enzyme! 1-2 questions will be review/cumulative from previous labs. This will help you succeed on the final exam. Once you begin a quiz, you may not leave the room and return to it. Quizzes begin promptly at the start of lab. If you are late, you may have less time (or none) to complete the quiz. There are no make-ups except for dire emergencies which require documentation (doctor's note, tow truck receipt).

Students who have done well in the past re-read the previous lab carefully for examples of concepts. They look over all the trends in data. They practice answering questions listed under Discussion, Questions for Review and Applying Your Knowledge at the end of most labs. Although you will not be turning those in, expect to see similar questions on quizzes. Consider writing out some of those answers as you are preparing. Often what we think we know in our minds doesn't come out the way we want on paper. Don't wait till the quiz to realize that...

Lab Write-ups

Lab write-ups are due at the beginning of class. Be on time to earn credit. If you are late, your work is late. Late work is not accepted. The questions you will answer in the lab write-up will be assigned as we are debriefing the results of the lab. Although you will be performing these labs with a partner or a group, lab write-ups **are not group activities**. You may discuss the results with others, but do your own work and don't copy the answers from someone else's report. **Plagiarism will result in a zero for the course.**

Lab Practical

Different than a typical sit-down test, during a lab practical you will be going around the classroom, answering questions at different lab stations. At each station, you will have 75 seconds to answer 1-2

questions. Once the 75 seconds are up, you will not have access to that question again. The content is cumulative. Once you begin the lab practical, you may not leave the room and return to complete it.

Biology Lab Safety Quiz on Blackboard

Students must complete this online safety quiz with a score of 100% by 8AM on Monday February 2nd in order to secure their enrollment in lab. NO EXCEPTIONS. You may take the quiz as many times as you need to. (You do not need to purchase lab coats or goggles.) Students who have not met this requirement will be dropped from the course, and their seat will be issued to a student on the wait list. Wait listed students will be notified of an available seat on Monday, February 2nd, and must complete the enrollment process ASAP in order to have access to Blackboard. Wait listed students have until 9AM Friday, February 6th to complete the quiz with a score of 100% in order to secure their enrollment.

Student athletes and DRS students

Please to notify me at the first lab meeting, or during my office hours. **Recording Lectures and Special Accommodations:** Students with documented disabilities should seek special accommodations for all classes through the DRS office on campus. If DRS sends me a file on you that lists recording lectures as an acceptable accommodation, then you may record lectures. Otherwise, you have to do it the old-fashioned way with pen and paper. If you record lectures in any form (video, audio, still pictures, etc.) without accommodation from DRS, that constitutes intellectual property theft, will result in a zero in participation points, and preclude you from turning in any assignments related to the lab session.

Important Dates

Census Date is February 23rd. This is the last day to add/drop the course or change your grading option; it is your responsibility to submit the grade change form to the Admissions and Records Office by 5pm that day.

Absences/Tardies

Attendance is required. Do not enroll in this class if you have conflicts or other commitments during your lab period. Every absence will result in one or more zero grades.

If you are late to class, or absent from class, you may not turn in your lab report from the previous lab. If you are late to class, or absent from class, you may not make up the quiz you missed. The only exception to this rule is in the case of illness or traffic emergency, and you must provide documentation. Documentation must be provided at the next office hour, which is also a good time to make up your quiz and turn in your lab write-up. Do not wait until the next week during lab to begin this process. The opportunity to make up missed points will expire.

If you miss a lab, you cannot make it up, and you cannot earn any credit for writing up that lab activity. There are no exceptions to this rule, even in the case of illness/emergency. If you were not present, no matter what the reason, you cannot earn credit for a write-up associated with that lab.

Student Conduct

- Many labs will run the full three hours. Do not schedule appointments or accept shifts at work that interfere with lab time.
- Read the lab carefully before class to avoid mistakes that will require you to start over.
- Always contribute to your lab group.
- Practice lab safety at all times (no beverages or open-toed shoes).
- As a group, help each other with clean up. Each instance of not cleaning up will result in a deduction of 5 points for the group.
- Do not use cell phones, or other electronic devices during class. **After 2 requests, you will be dismissed from lab that day and any assignments pertaining to that lab session will not be graded.**

Week of	Tentative Lab Schedule
January 27	Syllabus, Overview of labs
February 2	Scientific Investigation Lab <i>(Write-up : Lab Report due next week: methods and results sections only)</i>
February 9	Quiz 1 Microscopes and Cells Lab
February 16	Quiz 2 Osmosis and Diffusion Lab <i>(Write-up : Lab Report due next week: introduction and conclusion sections only)</i> Seed Germination Lab <i>(Write-up : Full Lab Report due in three weeks: all sections)</i>
February 23	Quiz 3 Osmosis/Diffusion lab write-up due Collect/analyze data from seed germination, design and set up follow-up experiment Enzyme Lab
March 2	Quiz 4 Collect/analyze data from seed germination follow-up <i>(full lab report including all sections due next week)</i> Respiration/Fermentation <i>(Write-up : Questions TBA due next week)</i>
March 9	Quiz 5 Seed Germination full lab report due Respiration/Fermentation write-up due Photosynthesis
March 16	Quiz 6 Mitosis Exercise Meiosis Exercise
March 23	Quiz 7 Genetics Activities
March 30 th	No lab this week
April 6 th	SPRING VACATION
April 13 th	Quiz 8 Bioinformatics/Worm Biology <i>(Write-up : Questions TBA due next week)</i>
April 20 th	Quiz 9 Bioinformatics write up due DNA Extraction, Pipetting, PCR
April 27 th	Quiz 10 Gel Electrophoresis Evolution
May 4 th	Quiz 11 Population Genetics
May 11 th	Lab Practical Exam
