“Writing today is not a frill for the few, but an essential skill for the many.”
--National Commission on Writing in America’s Schools and Colleges

Topics Include:

- Explore writing in math, science, English, history, physical education and other subject areas with experienced secondary teachers
- Design reading and writing assignments that promote deeper thinking and learning in all content areas
- Integrate the arts into STEM courses
- Discover how writing increases student understanding and achievement
- Identify critical literacy skills necessary to complete CCSS performance tasks
- Examine K-12 reading and writing anchor standards progression

Implementing the Common Core Standards Across all Content Areas

How will we teach students the 21st Century skills they will need for careers and college? Great Valley Writing Project teacher consultants are available to demonstrate how to teach students to think critically, solve problems, and show a greater depth of knowledge. Our experienced consultants provide classroom strategies that develop students’ abilities to read and respond to a wide array of texts from across the content areas: primary sources, technical diagrams, and scientific formulas.

Participants at our workshops can expect to see these strategies in action and view student writing samples. Our teacher leaders provide ready-to-use reading and writing strategies that support all students.
