Network Access on Apple iOS

Configuration of iOS Devices on eduroam network
iOS Network Access Configuration

- Begin by selecting the **Settings** icon on your iOS Device
iOS Network Access Configuration

- If you have previously connected to eduroam or csus-guest, please remove both networks before proceeding. If this is your first time connecting to eduroam, you may skip to Connecting to eduroam
- Tap the Wi-Fi category on the left-hand pane
- Tap the blue encircled “i” on either eduroam or csus-guest to display the network status
iOS Network Access Configuration

- To remove the network, tap **Forget This Network**

- You will be presented with a confirmation notification, tap **Forget** to continue
iOS Network Access Configuration

- You may also need to remove the device profile certificates.
- In **Settings**, tap on **General** in the left hand pane.
- Tap **Profiles** to view the device profile certificates.
iOS Network Access Configuration

- You will need to remove both “ClearPass…” and Device Enrollment profiles.
- Tap on the profiles to show the options.
iOS Network Access Configuration

- Tap on **Remove Profile**

- You will be prompted for your device passcode or fingerprint, input to continue

- Tap **Remove** to finish removing the profile
iOS Network Access Configuration

- Connecting to eduroam
- In **Settings**, tap **Wi-Fi**, and then on **eduroam**
iOS Network Access Configuration

• You will be asked to input a username and password, please use your full University email address and your 12 (or more) character password, tap Join to continue

• Please tap Trust to complete
Congratulations, you are now fully connected to the eduroam Wireless Network.
If you received any errors during the process, please contact the Technology Support Desk at 209-667-3687 or TechSupport@csustan.edu.
Or come see us in Vasche Library Room 150!
