Wireless Network Access on macOS

Configuration of macOS on eduroam wireless network
Wireless Network Access on macOS

- **Removing onboard enrollment**
  - If you have previously connected to **eduroam** via the onboard process, please remove the enrollment certificates by going to:
    - **System Preferences**
    - **Profiles**
    - Click on the **minus (-) button**
  - You will be prompted for your **computer password**, input to finish removal process
    - You may need to restart your computer afterwards
  - If there is no **Profiles** icon, please proceed to the **Connecting to eduroam** section
Removing old Networks

If you have previously connected to eduroam or csus-guest please forget them by going to your wifi signal icon on the menu bar and:

- Select Open network preferences…
- Click Advanced…
- Select eduroam and csus-guest
- Click on the minus (-) button
- Click OK
- Click Apply on the next window
- You may need to reboot your computer

If there is no eduroam or csus-guest network(s), please proceed to the Connecting to eduroam section
Wireless Network Access on macOS

- **Connecting to eduroam**
- Go to the wifi signal icon in the menu bar and select **eduroam**
- You will be prompted for a username and password, please enter the following:
  - **Username:** full University email address
  - **Password:** your 12 (or more) character password
- Click **Join** to continue
Wireless Network Access on macOS

- You will be asked to verify a certificate, click **Continue**
- Next, you will be asked to confirm changes to the Certificate Trust Settings
  - If you are an administrator on your computer, leave the username as is and enter the computer (not your University) password
  - Click **Update Settings** to finish

Congratulations, you are now fully connected to the **eduroam** Wireless Network
If you received any errors during the process, please contact the Technology Support Desk at 209-667-3687 or **TechSupport@csustan.edu**
