

NEW USER INTERFACE FOR 6867I AND 6869I PHONES

Release 4.2 introduces a new contemporary user interface for the 6867i and 6869i SIP phones.

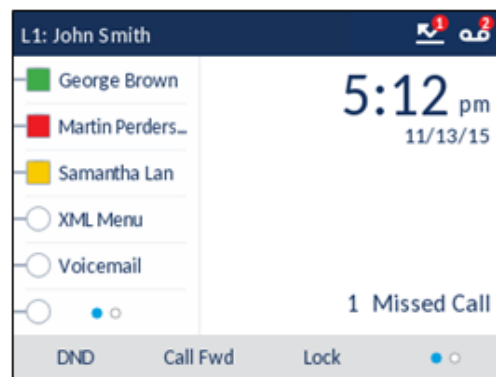

Highlights of the new UI include:

- New color scheme that uses a light background and limited use of color to important functions like active buttons, avatars, status, alerts, and warnings.

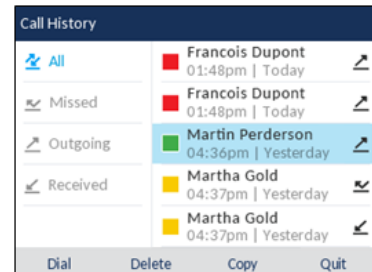

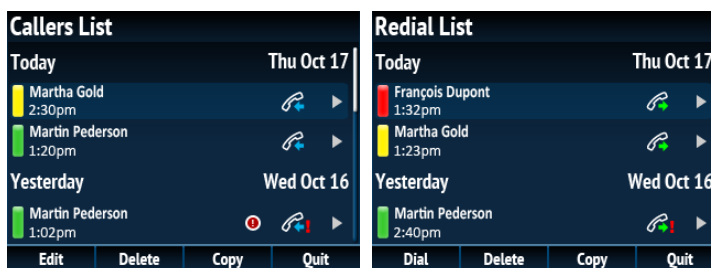

Single call on a 6869i, before and after version 4.2

- Completely redesigned icon set to align with other Mitel products and solutions.

Home/Idle screen on a 6867i, before and after version 4.2

- “Callers List” and “Redial List” consolidated into a “Call History” screen. In Call History, use the phone navigation button to view Missed, Outgoing, Received, or All calls to/from the phone.

Callers List and Redial List before version 4.2, and Call History in version 4.2

See your Mitel model-specific *SIP Phone User Guide for Clearspan* for more details on the new UI.
