

About the Dashboard

The Inspect dashboard is a robust tool for performing dynamic reporting on a variety of data points. You can analyze statistics and trending issues to improve program compliance, and export comprehensive data reports. The default tab of the dashboard is the **Overview** tab below.

The focus numbers at the top of the **Overview** provide a snapshot of data.

On the left side of the dashboard, you may filter by the following criteria:

- Location
- Inspection Started
- Program
- Configuration
- Inspected
- Category
- Inspector
- Route To
- Result

Dashboard Controls	Description
	Drill down in the data by clicking any of the charts or using the buttons that appear in the upper corners when hovering over a chart.
	To expand a view, click the Focus mode button.
...	To export tables to Comma Separated Value (CSV) format, click the ellipsis and click Export data .

Navigate to the following tabs for additional views of the data: **Overview, Program, Top, Average, Unresolved, Resolved, % Compliant, Comparisons** and **Comprehensive**.

The following is a summary of each report:

- Overview – Provides a comprehensive view of inspections across all locations. Focus numbers provide a quick summary of inspections and findings.
- Program – Provides an analysis of inspections starting from the program level. Users can filter data using the parameters on the left side of the dashboard.
- Top – Displays the top three findings for a specific time period for all locations. Users can expand this to show more or less than three. The dashboard also displays top checklist items by finding.
- Average – Provides a summary of averages for inspections, checklist items and findings. Users can see average days to complete inspections, average checklist items per inspections, average incidents per inspection, etc.
- Unresolved – Provides total number of unresolved inspections and the number of checklist items and findings that are incomplete during a certain period of time.
- Resolved – Provides total number of resolved inspections and the number of checklist items and findings that are complete during a certain period of time.
- % Compliant – Provides a summary of percent compliance across all locations, programs, checklists and categories.
- Comparisons – Provides a comparative analysis of findings by “Tag” and “Route To.”
- Comprehensive – Provides a full analysis of Inspect data across all locations with filters that allow users to summarize the data in the table below the chart.
