CSU Stanislaus
Intellectual Methods in the Humanities (HONS 3000)
Human Interests & the Power of Information (PHIL4350) — Spring 2019

Instructor: Dr. Chris Nagel
Office phone: 667-3712
Office: Science 1 Bldg., room 239
Office hours: Wednesday, 12:00-1:45 & by appointment
email: cnagel@csustan.edu
URL: blackboard.csustan.edu

NOTE: Email is my preferred non-face-to-face method of communicating.

Course Description and Learning Objectives

Catalog Description

Theme-based Honors seminar emphasizing humanistic inquiry. Close reading, thoughtful discussion, and critical analysis of arguments. Emphasis on making connections across disciplines and designing and completing a personal research project utilizing humanistic inquiry. One of two paired courses in the G.E. Summit Program.

Satisfies G.E. area 3 (in the new version) or F2 (in the old version). The specific GE anchor outcomes (under the new GE alignment) for the course are as follows:

3.2: Illustrate the ability to self-reflect and assess relevant ethical values
3.3: Demonstrate enhanced awareness of multicultural, community, and/or technological perspectives

Information has become the key term for describing the purposes of education and research. While advancing technology allows for ever greater accumulation and dissemination of information, what is easy to ignore is the purposes information serves, and at a still more fundamental level, what it means to pursue information. The course will focus reflective, critical attention on the connection between pursuit of information and the broader context of the human interests served by information. We will examine corporate capital and the information economy, the culture of information described by contemporary theorists, and especially our own situation within this culture, and in our everyday lives.

A student who successfully completes the course should: (1) develop and improve critical thinking skills; (2) develop and improve understanding of, appreciation for, and capacity for humanistic inquiry; (3) develop broader and deeper understanding of the issues covered in the course, in particular the multiple effects of information technology on knowledge, politics, and identity; and (4) develop and improve capacity to express ideas and present reasoning regarding course concepts and issues.

Texts

Course documents, available through Blackboard
Jean-François Lyotard, The Postmodern Condition (University of Minnesota Press)

Course Requirements

1. Regular, informed, active class participation. / 10%
   Participation is much more than simply showing up to class. The course is discussion-based as well as text-based. Reading the assignments for each class is a must, as well as an ongoing expectation. Participation in small-group and full-class discussions will be judged not just according to its frequency, but more importantly also on its relevance, informativeness, and insightfulness. Participation may also include brief, informal writing tasks.

2. Short papers. / 20%
   Papers to develop ideas, respond to questions or texts, will be fairly frequent. They are essential for building understanding of course material and concepts.
3. Two Expository Papers. / 20% each / 40% total
   These will be mainly textual explication of course material, but will also include interpretation and analysis of texts. I expect you to focus on one text/author in each of these papers, but you may introduce other material as part of your explication, interpretation, and analysis. These papers will indicate progress on essential course objectives.

4. Final Essay. / 30%
   This will be an original essay, bringing together themes, texts, topics, and concepts from the course. More to follow. The final essay will indicate achievement in essential course objectives.

Grading Criteria For Papers

Papers and final project will be evaluated on a 100-point scale divided into five categories.

<table>
<thead>
<tr>
<th>Category</th>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A.</td>
<td>20</td>
<td>Up to 20 points for argument. Good arguments are clear, concise, lead from point to point, and give cogent reasons for a conclusion.</td>
</tr>
<tr>
<td>C.</td>
<td>20</td>
<td>Up to 20 points for establishing and articulating the context of the discussion.</td>
</tr>
<tr>
<td>I.</td>
<td>20</td>
<td>Up to 20 points for demonstrated insightful and thoughtful approach to the issue.</td>
</tr>
<tr>
<td>R.</td>
<td>20</td>
<td>Up to 20 points for responding relevantly and accurately to assigned readings, and other resource material.</td>
</tr>
<tr>
<td>G.</td>
<td>20</td>
<td>Up to 20 points for grammatical clarity, including paragraph structure. Grammatical errors and poor paragraph structure make papers difficult to understand.</td>
</tr>
</tbody>
</table>

Course Expectations and General Procedure

Class sessions: My approach to teaching this course is to attempt to maximize student involvement in discussion. Students absolutely must complete required reading, on time. When I assign a reading for a class session, I expect all students to have completed reading the assignment prior to the start of that class session, and to be prepared to discuss the reading.

   Discussions in class range somewhat widely, especially when there is more student participation. In any case, I expect each student to take responsibility for understanding the key concepts and to be able to understand course material. Students should take the lead in asking for explanations, questioning concepts or argumentative reasoning, raising challenges, etc.

Reading materials: For most of my students, the kind of reading material is unfamiliar. The philosophical and other texts are often complex, as are the concepts they convey. There will be concepts and terminology that are unfamiliar. Students should make efforts of their own to come to understand the material (e.g., look up words in dictionaries, do some background reading on difficult concepts, etc.). Students should also ask questions in class or during my office hours. Students who are having severe difficulty, have a language barrier, or other specific problems with understanding should come to my office hours and get assistance—early in the semester.

Workload expectations: While some of the reading material is very difficult, much of it is not, and I believe there is a balance that is not too burdensome. On average (and per standards for college-level courses long established in the US), students should expect close to two hours of outside work to prepare for each hour of class time. I will distribute a list of tips for reading and preparing for class.

Communication outside of class: I prefer that students come to my office hours. Otherwise, I prefer email as a way to communicate; I do not text, and I do not like to use the phone. I will use Blackboard to send announcements to the whole class from time to time. Students should get into the habit of checking Blackboard, and their campus email accounts, most days.
Overall Course Grade Calculation

I will assign grades on a +/- scale, as follows (percentages are always rounded up): A=91% or more; A-=90%; B+=89%; B=81-88%; B-=80%; etc. I am willing to let students change grade options until the last class day of the semester (which is the deadline set by the university).

Some General Rules

1. **Academic dishonesty will not be tolerated!** Cheating or plagiarizing in the fulfillment of an assignment will result in failure of the assignment, and probable failure of the course. I will also, at my discretion, report your act of academic dishonesty to appropriate university officials.
2. **Late assignments** will be subject to penalty, 5 percentage points per day.
3. **Courtesy** is expected. Avoid interrupting fellow classmates; listen carefully to their arguments and respond thoughtfully. However please do feel free to make your own arguments in turn. I try to keep class informal and discussion open, but talking out of turn or dominating discussion, or making irrelevant comments, is not permissible.
4. **Tardiness** to class is strongly discouraged.
5. **Missing classes** is also discouraged. If you know you must miss a class, kindly contact me beforehand. At my discretion, I may excuse you when an absence is unavoidable and legitimate. In any event, it would be helpful to know if there were any announcements made in class (these will also usually be posted on my web page). Remember that scheduled class discussion days are mandatory; if you must miss a class discussion day you must explain your absence ahead of time to request not to lose credit for that day.
6. **Electronic communication** is not acceptable during class. This means no cell phones, text-messaging, emailing, etc. Accessing course materials on Blackboard is acceptable.
7. **Use of video, audio, or image capturing is prohibited** without permission of the instructor—including taking pictures of documents or projected notes.
8. **Beverages** are acceptable in class (in case you were wondering). Please avoid eating in class; popcorn is expressly forbidden.
9. **Do not wear unnecessary fragrances to class.**

Student Rights, Responsibilities, and Expectations

You have the right:
- to have and to express your own opinions on issues discussed in class
- to your own interpretation of texts
- to ask questions
- to think critically
- to fair evaluation of your performance in the course, according to the grading criteria specified

You have the responsibility:
- to give a rational account for your opinions
- to read and be prepared to discuss assigned texts and course issues
- to seek answers to questions
- to be reflective (that is, to be self-critical)
- to stay up-to-date on assignments, their due dates, and material missed due to absences
- to fulfill assignments as specified (and to ask questions if you do not understand the assignments)

You are expected:
- to be honest regarding your opinions and reasoning
- to come to understand the assigned texts
- to enter into the search for answers to questions (i.e., to take part in discussions)
- to engage in class discussion in a spirit of mutual respect and open dialogue
Course Outline

<table>
<thead>
<tr>
<th>Activities/Theories</th>
<th>Course Materials/Themes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Orientation</td>
<td>Part One: Phenomenology and Critical Theory</td>
</tr>
<tr>
<td>Disorientation</td>
<td>Dates (approximate): 26 January to 28 March</td>
</tr>
<tr>
<td>Phenomenology</td>
<td>Texts include Schütz, Horkheimer &amp; Adorno, Althusser</td>
</tr>
<tr>
<td>Ideology</td>
<td></td>
</tr>
<tr>
<td>Post-structuralism</td>
<td>Part Two: Critical Theory, Information</td>
</tr>
<tr>
<td>Post-modernism</td>
<td>Dates (approximate): 9 April to 16 May</td>
</tr>
<tr>
<td>Performativity</td>
<td>Texts include Baudrillard, Lyotard</td>
</tr>
<tr>
<td>Paralogy</td>
<td></td>
</tr>
</tbody>
</table>

Important Dates

No Classes on the following dates:

March 18-22: SPRING BREAK
March 28
April 11

DUE DATE FOR FINAL ESSAY: Thursday, May 16

Class Cancellations / Hybrid Course Format

It is possible, and even likely, that I will have to cancel some class sessions with very little notice, because of a medical condition I have called Ménière's Disease. When I am unable to come to class, I generally post something an announcement on Blackboard and send it via email through Blackboard, and often also post something to replace the class session. It is prudent to get into the habit of checking email and/or Blackboard prior to coming to class, especially if you have a long commute.

Troubled? Confused?

Please, don’t hesitate to get in touch with me to discuss anything about the course, or about anything else, especially anything that is getting in the way of your success and your learning. I hope that at least some of the course material and themes are very demanding, intellectually and otherwise. The demands are only worthwhile if you have the opportunity and resources to face them, however, and I want to do anything I can to provide what you need to have both opportunity and resources.

All provisions of this syllabus are subject to revision, including this sentence.
