

Summary of project

My poster had lots of details on how emotion can affect how students are motivated in school. Which was one of the reasons that I wanted to research more on the topic of emotion. I feel that student's emotion often gets overlooked, especially in a classroom setting. Teachers play a vital role in how students feel in the classroom, teachers are either engaging with students or they are strictly going over the lecture without stopping to check on the students. This in turn affects how the student feels at that given moment. I have found some interesting results when I was researching about my topic. I can't wait to get started and see what contributions I can make.
